TESTIMONY

"My father lived at Villa Monticello at the end of his life. He was taken care of by an excellent staff who helped him with everything. The location is beautiful and they have activities for the residents. I have to say that the staff here did the best they could for my father and they were very sweet and helpful to our family as well. I would recommend Villa Monticello for anyone who wants their loved ones cared for. Thank you Villa Monticello."

— Tiff R., Former Resident Family Member

ABOUT OUR FACILITY

Villa Monticello Assisted Living, is a licensed, non-medical, 29-bed memory care facility for seniors nestled in the rolling hills of Escondido, California. We offer care for residents with all types and stages of dementia. We recognize the need to provide each person with individualized care who have physical or mental challenges.

Our goal and philosophy is centered around supporting the resident's uniqueness and placing an emphasis on them as a whole. Our top priorities are to help promote their overall wellbeing, and to treat each person with respect and dignity.

OUR PROGRAM OF CARE

At Villa Monticello, we understand that each resident requires different levels of care. We take the time to carefully complete a pre-admission assessment prior to accepting any resident in order to create an effective plan of care that will meet their individual needs.

Our plan of care for each resident is a collaborative effort between the facility staff, family members, and other interdisciplinary professionals such as physical therapists, and home health care professionals. We regularly evaluate the needs of each person to ensure they continue to receive consistent and quality care.

NURTURING THE BODY & MIND

Each day, we keep our residents engaged in mental and physical activities that are both stimulating and beneficial for their overall wellbeing. Our activities are personalized to each resident's interests along with their physical and mental capabilities.

We strongly believe in the calming power of nature and the healing connection between the residents and their environment. With that in mind, Villa Monticello was designed to provide a nurturing environment that will nourish their body, mind, and soul. It sits on roughly ten acres of land with views of hills that are filled with mature oak trees, palm trees, flowers, and fruit trees. Our residents and their families have the freedom to safely explore their surroundings in an environment that neither isolates nor limits their movement, and is secured for privacy and safety.
